Summary

CS Engineering student at KIIT, graduating in 2027 with interest in GenAI product development. Targeting roles in backend, AI/ML engineering.

Education

Kalinga Institute of Industrial Technology (KIIT)
B.Tech in Computer Science Engineering

2023 – 2027
CGPA: 8.42

Skills

- **Languages:** Python, Java, SQL, JavaScript
- **Web Backend:** HTML, CSS, Flask, FastAPI, REST API Development, JSON Handling
- **Machine Learning & Deep Learning:** Scikit-learn, TensorFlow, Keras, Pandas, NumPy, Matplotlib, CNN, TF-IDF, NLP
- **Databases:** MySQL, SQLite,
- **Developer Tools:** Git, GitHub, GitHub Copilot, Jupyter Notebook, VS Code, Postman

Projects

FinWise – AI-Powered Expense Tracker

2025–26 [Github Link](#)

- Full-stack Flask + SQLAlchemy app with session-based auth; dual TF-IDF + Logistic Regression pipeline classifying transactions across 8 categories at 93%+ accuracy.
-

AgriSmart Advisor – Multimodal Agricultural Risk Scoring System

2025–26 [Github Link](#)

- Trimodal AI system (soil data + NLP text + leaf images) producing a unified ARI score via ensemble ML (RF, SVM, NB), TF-IDF disease pipeline, and MobileNetV2 CNN on PlantVillage (38 classes).
- Deployed via Flask REST APIs; React + Supabase frontend with auth and assessment history tracking.
- Developed fusion formula $ARI = \alpha(1-C) + \beta D$, which integrated crop confidence with weighted disease probability; categorized risks into Low/Moderate/High tiers while providing actionable farming advisories based on algorithm outputs.

Certifications

Machine Learning A-Z [2026]: ML, DL & AI – Udemy

2026 [Link](#)

Supervised/unsupervised learning, NLP, neural networks, and deep learning using Python and R.

AWS Cloud Foundations – Amazon Web Services

2026 [Link](#)

Core cloud concepts, AWS services, security, and architecture fundamentals.
